Teleconference Discussion

- The agenda is forthcoming.

ICS Guidance

- The new ICS guidance and associated Task Books requires a review. The goal of the review team is to determine if ICS Task Books meet the needs of a DOE specific IMT for qualifications. The review should also include potential additions to the Task Books such as DOE Site Specific training requirements (GERT, RAD Worker, Access Training, etc.) for our unique hazards associated with the DOE Complex.
- Chuck Fauerbach will follow-up with individuals for participation in the review (i.e. ORNL FD, LANL, and NNSS)

Action Items

- John Gamby forwarded the detailed ICS survey to Jeff Leifel and it was posted on the FFRWG SharePoint site within the group's password-protected folders.
- David Cavalier, SNL, recently had an active shooter exercise which resulted in a need for SOP updates. He expects to have further information available for the November teleconference.
