

Technology Working Group (TECHWG)

Highlights TECHWG Teleconference September 9, 2010, 2:00 p.m. to 3:00 p.m. EDT

Participants

| | |
|-----------------------|---------------------|
| David Blanchard, ORNL | Brian Latham, ID |
| Jim "JD" Daniels, NST | Jeff Leifel, ORISE |
| Tom Fields, INL | Po-Yung Lu, ORNL |
| Paul Hicks, B&W Y-12 | Steve Lockett, NNSA |
| Jack Huckabee, ORO | Richard Ohlsen, BNL |

Welcome

Jeff took roll call and gave the agenda overview. Remember, if you miss any of our calls you may listen to their recordings found on our SharePoint site.

TECHWG Co-chair

JD introduced our 1st co-chair, Dale Leschnitzer, from Los Alamos National Lab (LANL). Please welcome him on board.

TECHWG Charter

JD informed the group of our **approved** Charter which was sent to all members prior to the call and is available on our TECHWG SharePoint site.

TECHWG Key Issue #1

JD began the discussion of the group's first key issue - Complex-wide System Standardization. He then suggested TECHWG provide a position paper on cloud computing to the EMI SIG Committee.

In order to accomplish this effort, Tom Fields has agreed to take the lead on the position paper and will create a draft for the group's review. JD spoke with Davey Mathews, EMI SIG Chair, who asked we also include a powerpoint briefing in our submission. Once completed and blessed by the EMI SIG Committee, the position paper and briefing can go out across the complex for review as well as be used as a marketing package to assist in obtaining funding.

Tom will forward the draft to the TECHWG leadership for feedback and JD will create the powerpoint briefing slides. Once ready, Jeff will complete the document and powerpoint

Technology Working Group (TECHWG)

formatting to include ORISE templates. The plan is to have an entire draft available by mid October to be reviewed on our next TECHWG call.

TECHWG Key Issue #2

JD initiated a discussion of the group's second key issue – Standardized Notification System. Jeff and JD gave an overview of Alert FM, an FM radio-based alert and messaging system. The intent was to provide options to the complex for notification solutions.

Overall thought was to have a webinar / guest presentation by Alert FM in the near future. Jeff will setup this call over the next month.

In addition to this system, Paul Hicks and Richard Ohlsen have offered to give overviews of their current systems. These speakers will also be given time on an upcoming call.

TECHWG SharePoint & Housekeeping

Jeff spoke about SharePoint site utilization and announced 36 members of TECHWG have created accounts so far. He will send out an instruction guide on setting up SharePoint Alerts so you can be notified via email whenever something on the TECHWG site is updated. Another new item will be a notifications folder on the site to contain any related materials obtained from members and/or presenters pertaining to our 2nd key issue above.

Wrap-up

Next teleconference is **TBD**.

Meeting adjourned at 2:40 p.m. EDT.
