#### TECHWG Key Issue #1 Complex-wide System Standardization

---

In researching a proposal development for implementing a cloud-hosting system, Tom Fields (Key Issue #1 Lead) found another group at INL has already gained approval for the system. Thus, the focus of this item has shifted from the proposal stage to a process implementation stage. Tom Fields will explore the development of a cloud-hosted implementation process using the INL case-study. The end product may be a step-by-step process for cloud-hosted system implementation.
