The Radiation Emergency Assistance Center/Training Site (REAC/TS) has provided the U.S. Department of Energy (DOE) with expertise related to the medical management of radiation accidents since 1976. REAC/TS has responded to hundreds of calls for medical advice and consultation, internal and external radiation dose assessment, and other specialized assistance to physicians, nurses, health physicists, and other emergency response personnel. REAC/TS provides direct support for the DOE’s National Nuclear Security Administration (NNSA) Office of Emergency Response and the Federal Radiological Monitoring and Assessment Center (FRMAC).

REAC/TS maintains a 24/7 national and international radiation emergency response capability that includes deployable equipment, personnel experienced in decontamination and treatment of radiation injuries and illnesses, and management of the use of DTPA and Prussian Blue. Additionally, REAC/TS provides continuing medical education in its field of expertise through regularly scheduled in-house courses and specially designed off-site courses.

REAC/TS participates with the international community for radiation accident response via its designation as a World Health Organization (WHO) Collaborating Center of the Radiation Emergency Medical Planning and Assistance Network (REMPAN) and with the Response Assistance Network (RANET) of the International Atomic Energy Agency (IAEA). In addition, REAC/TS has provided continuing medical education and accident response in over 40 countries.

REAC/TS is part of the DOE response network. REAC/TS provides treatment capabilities and consultation assistance on a 24-7 basis, and can be reached by calling (865) 576-3131 (days), or after normal business hours contact DOE Oak Ridge Operations Center at (865) 576-1005. REAC/TS also has a cytogenetic biodosimetry capability, the “gold” standard of ionizing radiation biodosimetry, in which chromosome aberration analysis is used for ionizing radiation dose assessment.

For more information about REAC/TS or other ORISE programs, visit orise.orau.gov/reacts/ or contact REAC/TS at the Oak Ridge Institute for Science and Education, P.O. Box 117, MS-39, Oak Ridge, TN 37831-0117.

REAC/TS is managed by ORAU for DOE.

Radiation Emergency Medicine (REM)

October 21-24, 2014
April 14-17, 2015
November 4-7, 2014
June 2-5, 2015
February 3-6, 2015
August 11-14, 2015
March 3-6, 2015

This 3½-day course is intended for Physicians, Nurses, Nurse Practitioners and Physician Assistants who may be called upon to provide emergency medical care following a radiological or nuclear incident. Priority registration will be given to these groups of professionals. This course may also be relevant for Paramedic Instructors but is generally not intended for pre-hospital responders. The course emphasizes the practical aspects of initial hospital management of radiated and/or contaminated patients through lectures and hands-on practical exercises. The course begins with a discussion of the fundamentals of radiation physics, radiation detection/measurement/identification, prevention of the spread of contamination, how to minimize radiation dose to victims and providers, and the role of Medical/Health Physicists in caring for contaminated victims. Other topics include early evaluation and treatment of the acute radiation syndrome (ARS), acute local injuries, cutaneous injuries and combined injuries. Introductions to common physics, radiation detection/measurement/identification, prevention of the spread of contamination, how to minimize radiation dose to victims and providers, and the role of Medical/Health Physicists in caring for contaminated victims. Other topics include early evaluation and treatment of the acute radiation syndrome (ARS), acute local injuries, cutaneous injuries and combined injuries. Introductions to common

Maximum enrollment: 24
24.5 hours CME credit

The Oak Ridge Institute for Science and Education (ORISE) designates this live activity for a maximum of 24.5 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Health Physics in Radiation Emergencies (HP)

March 9-13, 2015
June 8-12, 2015

This 4½-day course is designed primarily for Health Physicists (HP), Medical Physicists (MP), Radiation Safety Officers (RSO) and others who have radiation dose assessment and/or radiological control responsibilities. The course presents an advanced level of information on radiological/nuclear event reconstruction, dose assessments/ estimations and integration of the physics discipline with medicine. The course provides the basics for HP, MPs and RSOs to interact with and provide advice and recommendations to medical practitioners for the diagnosis and treatment of radiation injuries and illnesses. Topics related specifically to medicine include acute local and total body radiation exposure, internal and external contamination and combined injuries. Other topics covered include internal and external dosimetry, bioassay techniques and public information management. Demonstrations, laboratory exercises and group problem-solving sessions complement the didactic presentations. It is recommended that participants have a basic understanding of radiation sciences before attending this course.

Maximum enrollment: 24
32 hours AHP credit

The American Academy of Health Physics (ABHP) designates this live activity for a maximum of 32 AHPH Credits.

---

Advanced Radiation Medicine (ARM)

April 20-24, 2015
August 17-21, 2015

This 4½-day course includes more advanced information for medical practitioners. This program is academically more rigorous than the REM course and is primarily for Physicians, Clinical Nurse Practitioners and Physician Assistants desiring an advanced level of information on the diagnosis and management of ionizing radiation injuries and illnesses. Advanced topics in the diagnosis and management of radiation induced injuries and illnesses includes the use of cytokines, stem cell transplants, antimicrobials, wound care and other advanced techniques. Group problem-solving is used to thoroughly orient attendees to the management of complex cases. This course is not recommended for pre-hospital, emergency planning or non-medical personnel. Only brief reviews of health physics fundamentals and emergency department interventions are discussed. Recent completion of the Radiation Emergency Medicine (REM) course is strongly recommended.

Maximum enrollment: 28
30 hours CME credit

The Oak Ridge Institute for Science and Education (ORISE) designates this live activity for a maximum of 30 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

COURSES IN MEDICAL MANAGEMENT OF RADIATION EMERGENCIES
registration form

Radiation Emergency Medicine (REM) ($200)
October 21-24, 2014
November 4-7, 2014
February 3-6, 2015
March 3-6, 2015
April 14-17, 2015
June 2-5, 2015
August 11-14, 2015

Health Physics in Radiation Emergencies (HP) ($225)
March 9-13, 2015
June 8-12, 2015

Advanced Radiation Medicine (ARM) ($275)
April 20-24, 2015
August 17-21, 2015

General Information
Travel, food, and lodging arrangements/expenses are the responsibility of course participants. Local lodging and transportation information will be sent to registered applicants.

Hard-copy course manuals for each of REAC/TS courses WILL NOT be provided. When you are accepted to attend one of REAC/TS courses, you will be sent an electronic link to REAC/TS website to access electronic copies of course presentations. You may elect to print these materials and bring to the course as you wish. REAC/TS lecture room is equipped with electrical outlets and WiFi should you wish to take notes on your computer.

Please do not send incidental fee until notified of acceptance in a course.

The incidental fee must be paid at least three weeks before the course begins or your name will be removed from the course roster and another applicant will be admitted.

Make checks payable to: Oak Ridge Associated Universities

A $25 administrative fee will be charged for a cancellation received less than two weeks before a course begins. We regret that we cannot refund the fee if cancellation is received once the course is in progress.

NOTE: Incidental fees specified in this brochure are subject to change. All applicants will be notified promptly of any changes.

Non U.S. citizens should apply early. Special forms are required. Courses fill rapidly. Early registration is recommended. Placement on a "waiting list" does not imply acceptance in any course. A new application must be submitted yearly.

Registrations are accepted by mail or online. The registration form is available online at orise.orau.gov/reacts/

OAK RIDGE INSTITUTE FOR SCIENCE AND EDUCATION
Managed by ORAU for DOE

The Oak Ridge Institute for Science and Education (ORISE) is a U.S. Department of Energy institute focusing on scientific initiatives to research health risks from occupational hazards, assess environmental cleanup, respond to radiation medical emergencies, support national security and emergency preparedness, and educate the next generation of scientists. ORISE is managed by Oak Ridge Associated Universities (ORAU).

Accreditation:
The Oak Ridge Institute for Science and Education (ORISE), is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

ORISE takes responsibility for the content, quality, and scientific integrity of this ACCME activity. Respective courses are also accredited by the American College of Emergency Physicians and the American Academy of Health Physics.

Funding for REAC/TS courses is provided by the U.S. Department of Energy.
These courses are based on work performed under Contract No. DE-AC05-06OR23100 between the U.S. Department of Energy and Oak Ridge Associated Universities (ORAU).
