PREFACE

While new treatments have significantly reduced the number of AIDS-related deaths, data from the Centers for Disease Control and Prevention (CDC) show that new HIV infections remain unacceptably high. There are an estimated 1,039,000 –1,185,000 people currently living with HIV in the United States, and in 2006 an estimated 56,300 new HIV infections occurred. Newly diagnosed HIV infection cases are disproportionately represented in people of color. As HIV infection rates in communities of color continue to rise, health professionals and community-based organizations must increase efforts to disseminate culturally relevant prevention education information and materials.

The Internet is a good starting point for finding current, culturally relevant resources, including educational materials, best practices, funding information, newsletters, and medical journals/databases. Additionally, the Internet provides 24-hour availability and access to newsgroups and listservs for people with similar concerns. Anyone with an Internet connection can access valuable prevention information.

The National Library of Medicine's Specialized Information Services Division is providing this document to health care professionals and community-based organizations to increase awareness of the wealth of prevention information and educational materials focused on communities of color that is available on the Internet. This information can be used to educate those with HIV/AIDS and those who have not been exposed to effective prevention messages, and may be of special interest to those in rural areas without access to a large health library and those who wish to find information anonymously to protect their privacy.

This document is also available on the Web at <http://www.orau.gov/meo/manuals/prevention>.

Division of AIDS, National Institute of Allergy and Infectious Diseases, National Institutes of Health

<http://www3.niaid.nih.gov/about/organization/daids>

The Division of Acquired Immunodeficiency Syndrome (DAIDS) was formed in 1986 to address the national research needs created by the HIV/AIDS epidemic. Specifically, the Division's mission is to increase basic knowledge of HIV disease and to support research that promotes progress in its detection, treatment, and prevention. DAIDS's programs support basic research, discovery and development of therapies for HIV infection and its complications, and discovery and development of prevention methods and strategies. Prevention strategies include biomedical interventions such as vaccines and topical microbicides, as well as prevention trials in the areas of sexual transmission and mother-to-infant transmission.

Health and Human Services Minority HIV/AIDS Initiative

<http://www.omhrc.gov>

The U.S. Department of Health and Human Services (DHHS) Minority HIV/AIDS Initiative, aimed at reducing the impact of HIV/AIDS on racial and ethnic minorities, is a part of DHHS' larger "Initiative to Eliminate Racial and Ethnic Disparities in Health" by the year 2010. This Minority HIV/AIDS Initiative Web page, administered by the Office of Minority Health (OMH) Resource Center, provides links to a wealth of HIV/AIDS-related services and information, especially for minority communities. There is a link to prevention information on the home page. The prevention information is further subdivided into African American/Black, American Indian/Alaska Native, Asian American/Pacific Islander, and Hispanic/Latino.

National Library of Medicine, National Institutes of Health, U.S. Department of Health and Human Services

<http://www.nlm.nih.gov>

The National Library of Medicine (NLM) is the world's largest medical library. NLM's online AIDS resources and other NLM databases are searchable at libraries, other institutions, and via personal computers.

Sponsor: National Library of Medicine, National Institutes of Health, U.S. Department of Health and Human Services
Areas of Focus: HIV/AIDS databases
Posters
Address: 8600 Rockville Pike
Bethesda, MD 20894
Phone: (301) 496-1131 (databases)
(888) FINDNLM
Fax: (301) 480-3537
E-mail: custserv@nlm.nih.gov

NLM's resources include the following:

Specialized Information Services HIV/AIDS Resources

<http://sis.nlm.nih.gov/hiv.html>

NLM's Specialized Information Services (SIS) has compiled a list of HIV/AIDS web links that focuses on both general information and information specific to various minority populations. This list also provides links in Spanish.

AIDSinfo

<http://aidsinfo.nih.gov>

AIDSinfo is a U.S. Department of Health and Human Services (DHHS) project co-sponsored by several government agencies to provide the latest federally approved information on HIV/AIDS clinical research, treatment and prevention, and medical practice guidelines for consumers and health care providers. This site also includes links in Spanish.

MEDLINE®/PubMed®

<http://pubmed.gov>

MEDLINE is the NLM's premier bibliographic database covering the fields of medicine, nursing, dentistry, veterinary medicine, the health care system, and the preclinical sciences. The [AIDS subset](#) of this database is available through PubMed and contains references to journal articles published since 1980 and includes citations to HIV/AIDS-related newsletters. This subset contains approximately 160,000 citations—over 50 percent of which have abstracts—with new citations added continuously. To access the AIDS subset of MEDLINE, go to the PubMed Web site and click on

Limits under the search term entry box. Then choose AIDS from the Subset menu. To find journal citations on prevention for minorities, try some of these search strings (capitalize Boolean operators, AND, OR, and NOT):

- prevention african american
- prevention hispanic OR latino
- prevention minority OR minorities
- prevention cultural

NLM Gateway

<http://gateway.nlm.nih.gov>

The NLM Gateway enables users to retrieve information from several NLM resources including MEDLINE, LOCATORplus (the online catalog of books and audiovisuals), and meeting abstracts. Abstracts are included from the Fifth through the Thirteenth International Conferences on AIDS, Symposium on Non-Human Primate Models for AIDS, the Annual Meeting of the American Society for Microbiology, and others.

DIRLINE®

<http://dirline.nlm.nih.gov>

DIRLINE is an online, annotated directory listing some 10,000 health organizations. It includes information on over 1,000 national and international organizations that provide AIDS-related services or information including direct support services, counseling, and databases; clinics and hospitals are not included.

MedlinePlus®

<http://medlineplus.gov>

MedlinePlus provides access to extensive, accurate, and current medical information about specific diseases and conditions. The site also has links to consumer health information from the National Institutes of Health, dictionaries, lists of hospitals and physicians, health information in Spanish and other languages, and clinical trials. All information links on this site have been peer-reviewed for accuracy. There is no advertising on this site, nor does MedlinePlus endorse any company or product. The section on AIDS contains many links to prevention items in Spanish. For specific communities of color, look under Health Topics for African American Health, Asian American Health, Hispanic American Health, and Native American Health. MedlinePlus includes a collection of health information in [multiple languages](#), providing access to high quality health information in languages other than English and Spanish. The collection contains over 2,500 links to information in more than 40 languages and covers nearly 250 Health Topics

History of Medicine Division

<http://www.nlm.nih.gov/hmd/>

NLM's History of Medicine Division (HMD) collects public health posters, including posters on AIDS. This international collection includes approximately 2,000 posters dealing with HIV/AIDS and related topics. For information about how the library acquires and distributes its pictorial materials, call the HMD Reference Desk at (301) 402-8878. To view the posters online, go to Images from the History of Medicine (IHM) at <http://www.nlm.nih.gov/hmd/>, click on **KEYWORD**, and search for "acquired immunodeficiency syndrome." IHM contains nearly 60,000 images of all aspects of health and medicine.

National Medical Association

<http://www.nmanet.org>

The National Medical Association serves as the collective voice of physicians of African descent and a leading force for parity in medicine, elimination of health disparities and promotion of optimal health.

PROGRAM MANAGEMENT WEB RESOURCES

HIV/AIDS PREVENTION WEB SITES FOR COMMUNITIES OF COLOR

SELECTED WEB RESOURCES FOR FUNDING: GRANTS AND FOUNDATIONS

In recent years, global efforts to promote health and prevent disease have generated millions of dollars for health care. A major portion of that funding has been allocated for HIV/AIDS prevention and intervention measures. As a result, many HIV/AIDS initiatives are eligible for grant awards through federal, state, local, and private funding sources. Generally, funding of this nature is achieved through solicited or unsolicited grant applications. Grant awards vary and may be used for operational and/or programmatic needs.

The internet serves as a valuable tool for researching many funding opportunities. Many federal agencies announce funding availability through their Web sites. In most cases, these databases provide links to other public and private funding sources; for example, the Society of Research Administrators (SRA) Grants Web, the U.S. Department of Health and Human Services, the CDC National Prevention Information Network (CDC NPIN), and the National Library of Medicine (NLM) are several of the many federal agencies that provide grant notification sites and have a network of links to federal government information and services.

Foundations are also excellent funding sources. Currently, it is estimated that there are over 43,000 private foundations in the United States. On an annual basis, these entities award more than \$8 billion towards personal, social, and scientific development. Foundation Directories serve as good resource tools for researching funding interest, eligibility requirements, funding range, and other important information. At present, roughly one percent of private foundations maintain Web sites that disseminate grant-related information. As more foundations use the Internet, that number will increase rapidly. Two major Web sites maintain links to foundations: The Foundation Center and the Council on Foundations.

AIDS Fund

<http://www.aidsfundphilly.org>

AIDS Fund is a large private funding source for organizations in the Philadelphia region. It primarily provides support for AIDS and HIV-related services, education, and prevention.

Eligibility: Non-profit organizations

Address: 1315 Spruce Street
4th Floor
Philadelphia, PA 19107

Phone: (215) 731-9255
Fax: (215) 731-0550

The American Foundation for AIDS Research (amFAR)

<http://www.amfar.org>

amFAR is a nonprofit, research-oriented organization dedicated to the support of AIDS research, AIDS prevention, and the advocacy of sound AIDS-related public policy.

Eligibility: Primarily scientists and researchers

Address: ATTN: Grants Administrator amFAR
120 Wall Street, 13th Floor
New York, NY 10005-3908

Phone: (212) 806-1600
Fax: (212) 806-1601

Catalog of Federal Domestic Assistance (CFDA)

<http://www.cfda.gov>

The CFDA is a catalog of federal programs, projects, services, and activities providing assistance or benefits to the American public. The catalog contains financial assistance programs administered by departments and establishments of the federal government.

Community of Science (COS) Funding Opportunities

<http://fundingopps2.cos.com>

COS Funding Opportunities is a comprehensive source of grant information available on the Internet. The COS Web site includes more than 24,000 grant sources, including federal and regional governments, foundations, professional societies, associations, and corporations.

Computer Retrieval of Information on Scientific Projects (CRISP)

<http://crisp.cit.nih.gov>

CRISP is the Department of Health and Human Services' searchable database of federally funded biomedical research projects conducted at universities, hospitals, and other research institutions.

Council on Foundations

<http://www.cof.org>

The Council on Foundations is a nonprofit membership association of grantmaking foundations and corporations. Membership seeks to serve the public good by promoting and enhancing responsible and effective philanthropy.

Address: 2121 Crystal Drive, Suite 700 A
Arlington, VA 22202

Phone: (800) 673-9036

Elton John Foundation

<http://www.ejaf.org>

The Elton John Foundation is an international non-profit organization established specifically to provide funding for education programs targeting HIV/AIDS prevention and or the elimination of discrimination against people living with or who may be at risk for AIDS.

Eligibility: Non-profit organizations

Address: 584 Broadway, Suite 907
New York, NY 10012

Federal Register

<http://www.gpoaccess.gov/fr/index.html>

The Federal Register contains information on federal legislation and appropriations, including grant notification from federal agencies and organizations. It is produced by the Office of the Federal Register, via the General Printing Office and published every federal working day.

The Foundation Center

<http://foundationcenter.org>

The Foundation Center is a nonprofit management resource information center. It contains a wealth of information for grantseekers and grantmaker services and provides access to searching private, community, and corporate foundations. Other resources include training and seminars in grantwriting and non-profit organization management.

Address: 79 Fifth Avenue/16th Street
New York, NY 10003-3076

Phone: (212) 620-4230 or (800) 424-9836

National Library of Medicine's AIDS Community Information Outreach Project

http://www.sis.nlm.nih.gov/outreach/aids_cio_projects.html

The purpose of the AIDS Community Information Outreach Project is to design local programs for improving HIV/AIDS health information access for patients and the affected community as well as their caregivers and the general public. Emphasis is on providing information or access to health and medical information in a way that is meaningful to the target community, and increasing the awareness and utilization of NLM online health and medical resources in the HIV/AIDS Community. NLM has continued to issue this solicitation and has awarded over 225 organizations with funding in an effort to eliminate disparity of information access in the HIV/AIDS Community. Express awards are offered for up to \$10,000 and Standard awards are offered for up to \$60,000

Eligibility: Non-profit organizations
Address: Office of Acquisitions
National Library of Medicine (NLM)
6707 Democracy Blvd., Suite 105
Bethesda, MD 20892-5488
Phone: 301-496-6546
E-Mail: rhwilli@mail.nih.gov

National Foundation for Infectious Diseases

<http://www.nfid.org>

The National Foundation for Infectious Diseases is an independent health care foundation that supports research on the causes, cures, and prevention of infectious diseases through grants and fellowships.

Eligibility: Health specialist trainees in infectious diseases and related medical science areas
Address: 4733 Bethesda Avenue, Suite 750
Bethesda, MD 20814
Phone: (301) 656-0003
Fax: (301) 907-0878

Society of Research Administrators (SRA)

<http://www.srainternational.org>

The SRA is a non-profit association serving as a grant notification site and management information system. The SRA Web site (<http://www.srainternatio=nal.org/sra03/grantsweb/index.cfm>) stores a myriad of current information ranging from general resources to government policies and regulations.

Address: 1901 N. Moore Street, Suite 1004
Arlington, VA 22209
Phone: (703) 741-0140
Fax: (703) 741-0142
E-mail: info@srainternational.org

SELECTED WEB AND PRINT RESOURCES FOR PROPOSAL WRITING

The first step in achieving grant funding is developing the proposal. A well written proposal is an essential component of the grant-seeking process. Although proposal writing can seem overwhelming for the novice, many resources are available that can assist tremendously with the organization and development of an award-winning proposal, such as those listed below. It is also important to note that proposal writing is just one step in the process. The bulk of time during the initial phase should be spent developing the program or project and researching/identifying appropriate funding sources.

A good proposal is based on sound program planning.¹ A well written proposal will generally contain the following components:

- Executive Summary
- Statement of Need/Social Problem
- Project Description (include goals and objectives)
- Method/Work Plan
- Evaluation Plan
- Future Funding Plan
- Budget/Budget Narrative
- Project Timeline/Activities Chart
- Organization Information
- Conclusion
- Appendices/Addenda

In preparing for the final phase of proposal development (the actual writing), be certain that the program or project is in the current interest of the funder. Keep in mind that a funder's interest may change over time. Also, be sure to adhere to all guidelines and follow the format closely. Proposals are evaluated not only on merit, but the applicant's ability to follow instructions. Critique the proposal objectively, and ask others to read it and provide feedback. Seek technical assistance from the funder if necessary to answer any questions regarding the proposal. Develop a checklist to keep track of all proposal components and requirements, including page limits, number of copies, and the method of submission to meet the application deadline. Often, applications submitted after the deadline will not be considered.

SELECTED WEB RESOURCES FOR COMMUNITY ASSESSMENT, PLANNING, AND PROGRAM DEVELOPMENT

Assessing a community's HIV/AIDS prevention needs begins with locating, understanding, and deriving information from statistical data. The following Web sites contain the most accurate and up-to-date sources of statistical data on HIV/AIDS, population, and health status indicators. Also included is an online self-study guide for understanding and using statistics.

U.S. Census Bureau

<http://www.census.gov>

The U.S. Census Bureau site provides the latest data on racial and ethnic populations in the United States. The Census Bureau furnishes a wide variety of information on social and economic characteristics of racial and ethnic populations, such as household composition, ethnicity, and income. The Bureau prepares in-depth reports on important social, economic, and demographic issues. The information available at this site is essential for the work of HIV/AIDS community planning and assessment groups.

HIV/AIDS Surveillance Report

<http://www.cdc.gov/hiv/stats/hasrlink.htm>

The HIV/AIDS Surveillance Report is published annually and contains tabular and graphic information about U.S. HIV and AIDS case reports, including data by state, metropolitan statistical area, mode of exposure to HIV, sex, race/ethnicity, age group, vital status, and case definition category. This is the most accurate and comprehensive source of U.S. HIV/AIDS statistical information. This site would be useful to individuals conducting community needs assessments, identifying priority groups, and writing requests for funding.

National Information Center on Health Services Research and Health Care Technology (NICHSR)

<http://www.nlm.nih.gov/nichsr/usestats/index.htm>

Assessing a community's HIV/AIDS prevention needs requires information drawn from statistical data. Many individuals working with HIV/AIDS prevention groups have limited experience with statistical data. To help develop this skill NICHSR offers *Finding and Using Health Statistics: A Self-Study Course*. This course seeks to assist users in locating and understanding statistics. Although designed for librarians, this self-study course is a useful tool for health educators, community planning group members, and novice users of health statistics.
