

My STEM City!

October 2026 STEM City Challenge | Grades K-2 Design Sheet

My First Name:

My State:

1. What new or existing technology did you add to your city?

(Example: nuclear energy, flying cars, a robot helper, AI streetlights)

2. What does your new technology do? Tell us how it works!

3. How does this technology help your city?

(Think: Does it help people? The Earth? Keep people safe? Save energy?)

4. Every invention has problems too! What is one problem your technology might have, and how would you fix it?

(Example: It might run out of power, so I would add a battery to store extra sunlight.)

5. Draw and color a picture of your city with your added technology!
