

STEM Diversity Summit 2024

Career Connections to Federal Internships & Fellowships

Jenesis Cochrane

Jenesis Cochrane is a Ph.D. student in the Chemical and Biological Engineering department at Northwestern University. She received a Bachelor of Science in Engineering (BSE) in chemical and biomolecular engineering from the University of Pennsylvania in 2023. Having participated in the Mickey Leland Energy Fellowship Program in 2022, she owes much of her desire to pursue sustainable energy research to this experience. In addition, Jenesis has interned at Oak Ridge National Laboratory as a GEM fellow in the summer of 2023.

She is currently co-advised by Dr. Jennifer Dunn and Dr. Justin Notestein and hopes to combine their expertise to pursue a career in sustainable energy development. In her free time, Jenesis enjoys playing volleyball by the lake, reading, and growing her pop culture knowledge.
