

# STEM Diversity Summit 2024

Career Connections to Federal Internships & Fellowships

## Felicie Trebian

Felicie R. Trebian is a master's student in system management at Navajo Technical University, with a strong focus on information technology and cybersecurity. A member of the Navajo Tribe in Crownpoint, New Mexico, she holds a bachelor's degree in applied science – information technology and has gained valuable hands-on experience through internships at Sandia National Labs and Columbia University's Lamont-Doherty Earth Observatory. Felicie's work includes User Experience (UX) design, data visualization, and climate change research, with a passion for leveraging technology to solve complex problems. She is an

Early Career Fellow with the Center for Diverse Leadership in Science and has received several honors, including a scholarship from the Grace Hopper Celebration for Women in Tech and first place in Website Design at the AISES Conference. Alongside her academic achievements, Felicie is actively involved in community engagement, promoting STEM education, and maintaining a keen interest in historical research, photography, and indigenous culture.
