I ROBOTICS

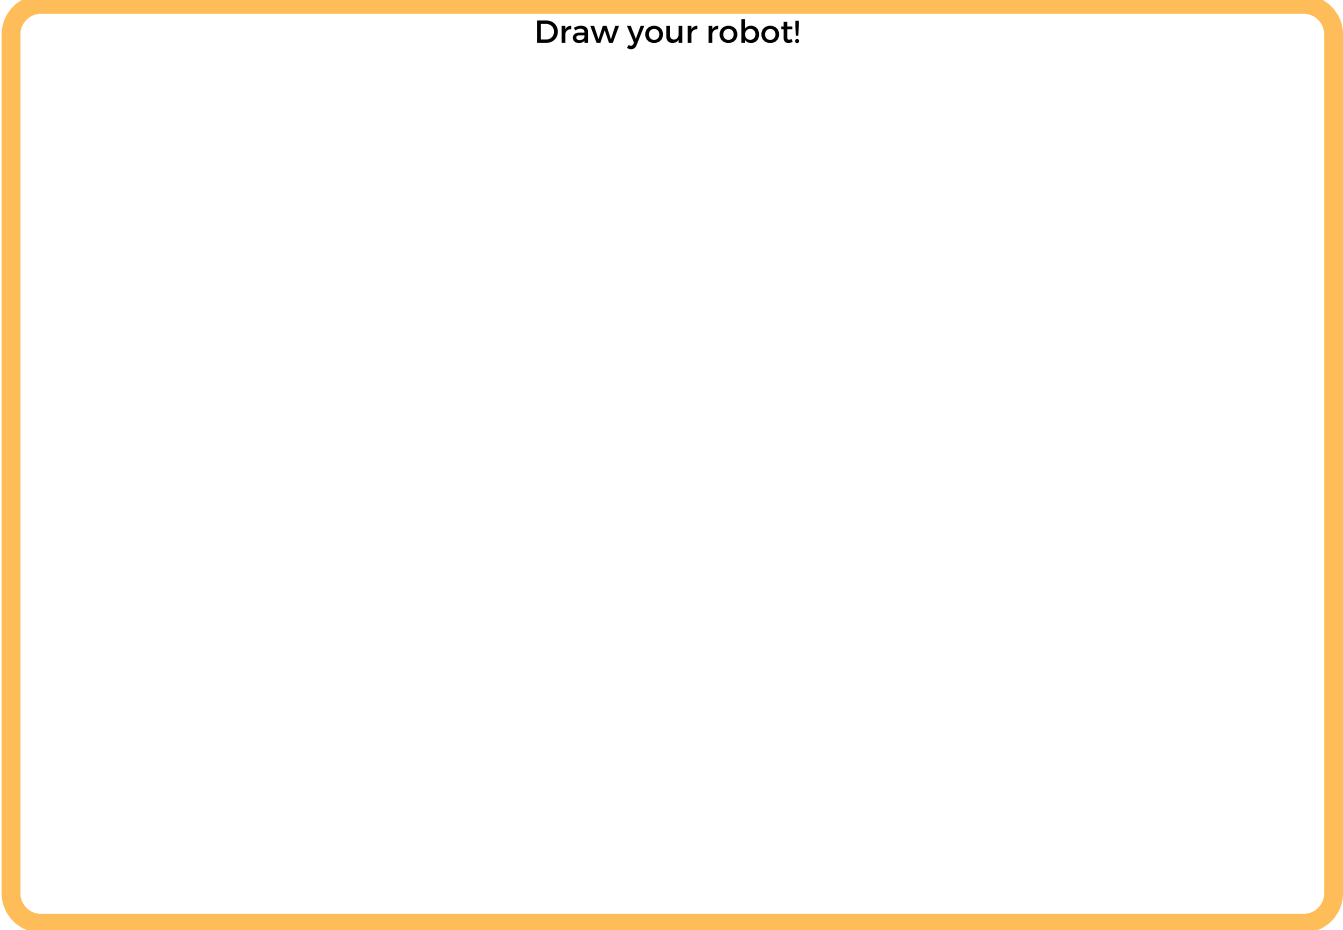

Is there a problem in your life or community that you think could be solved with a robot? Now is your chance! Follow the questions on the worksheet to guide you through designing your robot.

What problem are you trying to solve?

Who does this problem affect?

Why is the robot important to a person or society?

Draw your robot!

Briefly explain (2-3 sentences) how the robot solves the problem you are trying to fix.

Name one strength of your robot. (What makes your robot good?)

Name one weakness of your robot. (What is bad about your robot?)

How could you make your robot better?
