## THE SCIENCE BEHIND THE SCENE

Movies are fun to watch and you can also learn a lot from them! Pick one scene from a movie or show and explain why it is fact or why it is not.

1. Use the box below to draw out the scene.

2. Explain what is happening in the scene you drew.

Two people came to take the old man to the senior care center. The man told them that he wanted to get something from his home first. After he went in, balloons came out of the chimney and the house started flying.

3. Is this fact or fiction? Explain your answer.

It is fiction. 100,000 big helium balloons can carry a small house, but there is not enough space in the house to store all of the balloons.

And the balloons are too big and too many to be able to go up from the chimney.
