

## Got Bots? Engineering Design Challenge K-2

How many times have you come across a problem in your life that could be solved with the help of a robot? What about a problem in society? Do you think you can design a robot that can solve a real-world problem? Now is your chance! Follow the questions on the worksheet to guide you and don't forget to put your creative cap on when drawing your robot!

| What problem are you trying to solve? | Who does this problem affect? | Why should the problem be solved or why is the robot important to a person or society? |
|---------------------------------------|-------------------------------|--|
| -----                                 | -----                         | -----  |
| -----                                 | -----                         | -----  |
| -----                                 | -----                         | -----  |
| -----                                 | -----                         | -----  |

Draw your robot!
